ABOUT CRPT PROJECT

Cryptos is a city from Planet Eltron. It is build by Artificial intelligence robots. The robots have taken the planet and rises an army in it.

The main trading unit in the City is Cryptos Token.

This is decentralised blockchain project that is a part from a huge series of smart contracts that will represent cities from the Eltron planet.

Our project is listed on Pinksale for presale and after the end of the presale will be listed on PancakeSwap for everyone who didn't had the opportunity to participate.

We have our mobile application uploaded on Google Play store when you can see our NFTs collection. More features will be introduced after the end of Presale.

Our Roadmap is defined and we will make every step when the time comes.

For our token holders who participate in Presale there will be special rewards.

The winners will be choosed randomly. Our rewards are : USDT vouchers, Unique NFTs and many more ...
